

# HKE Long-Acting Hexagonal Water Generator

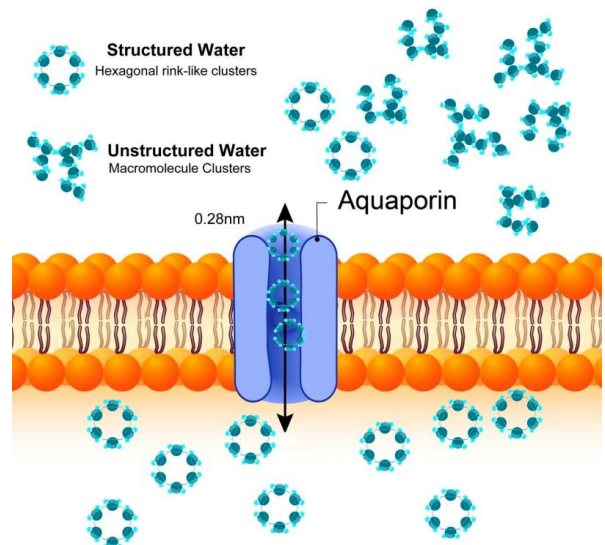

## Why Hexagonal Water is Important to Health

Water is what we depend on for every bodily function and ultimately for survival. When a baby is born, water in its body cells is a hexagonal ring-like cluster, also called structured water or small molecule cluster water. This is why the baby's skin is tender and full of vigor.

As one grows older, the human body begins to lose hexagonal structured water in its cells and DNA. At the age of 58, only 23% of the water in the body is structured water. The loss of hexagonal structured water will affect the body's metabolism, skin complexion and circulation, healthy immune system, and detoxification. More and more harmful substance accumulates in the body and one becomes aging and even gets a disease.

*"Aging is a loss of Hexagonal Water from organs, tissues and cells, and an overall decrease in total body water. Replenishing the Hexagonal Water in our bodies can increase vitality, slow the aging process, and prevent disease". Jhon, M.S., The Water Puzzle and the Hexagonal Key*

Researchers are also finding that cells absorb small molecule cluster water (5 ~ 8 water molecules) better than macromolecule cluster water (12 ~ 20 water molecules). A person drinking macromolecule cluster water can still get dehydrated because the water molecules are much too big for cell absorption. Peter C. Agre, a 2003 Nobel-Prize winning biologist, discovered that hydration is linked to the aquaporin channel in a cell, which can only receive small molecule water at a time. The **HKE Long-Acting Hexagonal Water Generator** has the ability to crack macromolecule water to the small molecule, allowing for better hydration for humans, animals, and plants.

## How to Detect Hexagonal Water

Oxygen-17 Nuclear Magnet Resonance ( $^{17}\text{O}$  NMR) is one of the very few methods that can verify molecular size. The ordinary tap water's  $^{17}\text{O}$  NMR of half-width is greater than 130Hz which is composed of large molecular units (between 12 and 20 individual  $\text{H}_2\text{O}$  units). While water's NMR half-width less than 90Hz can be called "small molecules cluster water", which is shown to normally average just 6 molecules per cluster.

## HKE Technology in Long-Acting Hexagonal Water Generator

The main body and seamless coiled pipe of the HKE Long-Acting Hexagonal Water Generator are made by stainless steel 316L, medical grade. The length of the seamless coiled pipe is 6 meters travel. Between the inner body and seamless coiled pipe are full of HKE energy fluid which is designed to crack macromolecule cluster water to small molecule cluster water or hexagonal water. When water is run through 6 meters coiled pipe, hexagonal water is produced.

The energy fluid influenced by the far-infrared emissivity of the sun and the gravity of the earth's rotating magnetic field creates physical resonance. Under the effect of this resonance, the molecules are miniaturized. HKE energy fluid induces the hydrogen bond break between water molecules and destroys Van der Waals Force, thereby maintaining the water molecule clusters in a smaller form. The product does not need to be powered, heated, condensed, gasified or added any additives during the whole process.

### What are the Benefits?

The smaller the water molecule cluster is, the higher the hydrogen bond energy contained in the water molecule will be. Therefore HKE hexagonal water has high penetration, high dissolved oxygen, and strong kinetic energy. It is long-acting hexagonal water, which can freely cross between the human cell membrane and play the role of transporting nutrients, expelling waste, and making the communication between internal organs. Long-term drinking of HKE structured water can improve body detoxification and metabolism, effectively activate cells, and strengthen the immune system. It is also helpful to people with constipation, hyperuricemia, gout, and other diseases. **Furthermore, the bad pollutant memories are removed as well if water can retain the memory of pollutants.**

*"Hexagonal Water is found surrounding healthy DNA, whereas unorganized water is found surrounding the DNA of diseased tissue". - Jhon, M.S., The Water Puzzle and the Hexagonal Key*

### Mechanical Specification

Material	316L Stainless steel, Medical grade
Coiled Pipe	6M seamless coiled pipe, $\varnothing$ 0.5" , 316L
Maximum Flow Rate	1800ml/minute
Inner Pipe Capacity	400ml
Initial Flow Rate	3 seconds
Height (including feet)	530 mm
Diameter (Outer)	102 mm
Weight	13.6 kgs (N.W.); 14.5 Kgs (G.W.)
Half-life Period	10 years
SGS Non-Radioactive Test	Compliant with Non-Radioactive Contamination at International level (Report No. KK-19-07054)
Package (Box)	520 (L) x 210 (D) x 340 (H) mm
